Format: 1-day training at your premises or virtual (standalone or as a second day after the Data Management for BA's training)

Duration: 8 hours including 30-minute lunch break and two 15-minute breaks

Group size: 3-15 participants

Target audience:

- Business analysts, business systems & BI analysts
- Business analysis team managers & team leads
- Business subject matter experts
- Data governance team members

Included: participant handouts, templates, individual & group exercises with instructor feedback. Exercises can be based on the business entities specific to each industry.

Other training: Business Analysis in One Day, Business Modelling Practice
